

ROOFING SOLUTIONS

JIFFY SEAL ICE & WATER GUARD EXTREME™ (300°F)

Combines Protecto Wrap's first-in-class skid resistant Jiffy Seal Ice & Water Guard® woven surface film with our Super Stick Adhesive Technology™ which sticks at temperatures as low as -20°F and has an in-service temperature range up to 300°F.

NEW

- Adheres or sticks down to -20°F (-28°C) and for high temp and high UV applications
- Lightweight and easy to carry – 2 sq. roll weighs only 25 pounds
- Meets Building Code requirement ICC-ES AC48 and IAPMO ER-613 certified
- No primer required
- Can be used under steel, copper, corten and zinc
- No need to warm or heat the roll before using – rolls can be left out in the cold
- 6 month UV exposure
- Roll sizes available: 36" x 66' • High temperature: 300°F

JIFFY SEAL® ICE & WATER GUARD HT 25 (250°F)

A high temperature, 25 mil, cold applied, self-adhering membrane composed of a proprietary slip resistant, tri-layer, woven polypropylene fabric with a layer of rubberized asphalt adhesive. Designed for low slope areas, hip, ridge, valleys, rake edges, confined rake edges, around skylights and chimneys.

- 25 mil thickness with 6 month UV exposure rating
- Proprietary slip resistant surface for added footing safety
- Split release film
- Can be installed on roof pitches down to 2"/12"
- Seals around properly installed fasteners
- Waterproof, air and vapor barrier
- Can be installed horizontally or vertically (as code allows)
- Roll sizes available: 36" x 65' • High temperature: 250°F

JIFFY SEAL® ICE & WATER GUARD HT (250°F)

A premium, high temperature, 40 mil, self-adhering membrane composed of a proprietary slip resistant film with a rubberized asphalt adhesive. Protects your roof from leaks caused by ice dams and windblown rain.

- 40 mil thickness
- 6 month UV exposure rating
- Proprietary slip resistant surface for added footing safety
- Split release film
- Seals around properly installed fasteners
- Rubberized asphalt adhesive
- Roll sizes available: 36" x 66' and 36" x 75' • High temperature: 250°F

JIFFY SEAL® ICE & WATER GUARD HT BUTYL (300°F) SAME AS JIFFY SEAL ICE & WATER GUARD HT ONLY WITH HIGH TEMP BUTYL ADHESIVE

For very high temperature, highly conductive roofs and high altitude applications. A proprietary underlayment with a slip resistant film on one side with a high temperature recycled butyl adhesive, protecting your roof from leaks caused by ice dams and windblown rain.

- Can withstand temperatures up to 300°F without degradation
- 6 month UV exposure rating
- Proprietary slip resistant surface for added footing safety
- Split release film
- Recycled 100% butyl adhesive
- Seals around properly installed fasteners
- Roll sizes available: 36" x 66' • High temperature: 300°F
