

# WHY SEAL?

Concrete and masonry, even though seemingly hard, dense, and solid, is quite vulnerable to the effects of weather, traffic, and sunlight.

To make sure your concrete surface is properly protected, it should be sealed with **INTRAGUARD** from W. R. MEADOWS.

With a proper application, your concrete and/or masonry surface will be durable, long-lasting, and aesthetically pleasing.

Treated with  
**INTRAGUARD**

NON-Treated  
Concrete

## FEATURES/BENEFITS

- **INTRAGUARD** penetrates the surface to form an integral barrier to moisture penetration.
- Reduces chloride penetration into concrete and masonry surfaces.
- Helps protect properly placed and cured concrete and masonry from scaling and freeze thaw damage caused by deicing chemicals.
- Breathable – does not trap moisture.
- Reduces water absorption.
- Water repellent.
- Water-based, VOC-compliant.
- Leaves no gloss or shine.
- Non-film forming, non-staining.
- Can be used as a primer for improved adhesion with paints or mineral substrates.

## INTRAGUARD

**INTRAGUARD** is a water-based, penetrating chloride screen, water repellent sealing compound for exterior concrete and masonry surfaces. Specifically designed to limit the intrusion of moisture and chlorides into the substrate, this proprietary blend of silane and siloxane penetrates into the pores of the concrete and masonry to help protect the surface from scaling caused by deicing salts. The product also protects vertical masonry surfaces from the ingress of water.

**INTRAGUARD** protects virtually all exterior surfaces, including concrete driveways, walkways, and parking lots. Surfaces treated with **INTRAGUARD** will also provide resistance to water-related stains and provides spill-and-wipe protection for some common chemicals.

A photograph showing a person's legs and feet in brown work boots, standing on a concrete surface. They are holding a red sprayer with a yellow nozzle, which is spraying a white liquid onto the concrete. The background shows a concrete driveway with expansion joints.
