

# TREMPRO® 626

Single-Component, General Purpose,  
Textured Polyurethane Sealant

## Product Overview

TREMPRO® 626 is a one-part, medium, gun grade polyurethane sealant. It is designed for use in many applications, including lap joints on semi-truck trailers, shipping containers, RV trailers, and rail cars. TREMPRO 626, with its unique texture, has been used as a perimeter sealant around window and door installations where texture compliments the stucco exterior façade.

The product has excellent adhesion to most substrates without the use of a primer. Once cured, the product exhibits tenacious adhesion and has the ability to be subjected to stress and vibration as well as expansion and contraction within a joint.

## Features & Benefits

- Easy to apply with conventional caulking equipment
- Tough sealant designed for a variety of uses
- Effective in holding roof sheets in place against normal load vibration and air forces
- Superior sealant for log home chinking, butt joints for pre-engineered metal buildings and applications that require continuous immersion in water
