

## TECHNICAL LETTER

### COMPATIBILITY OF PROTECTO WRAP PRODUCTS WITH CERTAINTEED GLASROC® SHEATHING

Protecto Wrap Company tested Protecto Super Stick Building Tape®, Protecto Universal Primer Free Membrane™ and Protecto Primer-Free Stucco/EIFS Tape on CertainTeed GlasRoc® Sheathing for Adhesion and Chemical Compatibility Per AAMA 711 and we have found the products are compatible. Adhesion to the GlasRoc Sheathing was found to be excellent and exceeded the minimum 1.5 pli without the need for Primer.

These three products utilize Protecto Wrap Company's *Super Stick Adhesive Technology™*. This unique adhesive allows for applications of these flashing tapes/membranes in temperatures down to -20°F with in-service temperatures from -45°F to 300°F (-42°C to 148.9°C).

Protecto Wrap does not recommend application over surfaces with standing water or visibly wet surfaces, dirty surfaces, uneven surfaces, frozen surfaces or surfaces contaminated with foreign substances such as dirt, dust, mud, release agents, grease, oil or solvents.
