

## **Field-proven M-1 Universal Adhesive Sealant**

Millions of cartridges sold throughout the construction industry—now available in handy 5 oz. squeeze tubes.

Use, re-cap and use again!

M-1 works as both an adhesive and a sealant and works throughout the building envelope and more:

- Emergency underwater repair
- Copings
- Masonry
- Solar panels
- Window and door installation
- Insulation
- Roof repair
- Core cuts
- Penetration seals
- Lightning protection
- Metal architecture
- Automotive repair

M-1 has been used for more than 20 years by contractors throughout North America. It bonds to metal, masonry, wood, glass, composites, vinyl, fiberglass, polystyrene, and many engineering plastics. It's so effective, many contractors simply say: "M-1 and you're done."

M-1 is a great field performer:

- High strength – nearly 400 psi bond strength
- Tough
- Fast-setting
- Non-shrinking—100% solids
- Applies down to 32°F
- Effective on damp surfaces
- No caulk gun required

M-1 is environmentally safe: no solvents, no fumes, no risk of fire or explosion, safe for confined areas.
