

Ideal For Thin To Moderate Materials

The original and oldest style of caulk gun.

Every ratchet model has a consistent 6:1 thrust ratio. Due to Newborn's precision milling process, the teeth on the rod are equidistant from each other, allowing the user to be precise with the amount of material extruded with each trigger squeeze.

In addition, the pawls that grab the teeth and push the rod forward are heat treated for extra durability.

77 / 035

6:1 Thrust Ratio
 77: 10oz Cartridge
 035: 29oz Cartridge
