

MPC Multipurpose Protective Coating

Renovate, Waterproof and Protect with the Versatility of MPC

MPC (Multipurpose Protective Coating) is an extremely durable, cost-effective and versatile protective coating that is “breathable” and allows for the transmission of moisture vapor from within concrete and other porous substrates without blistering or delamination. By lowering internal moisture content, MPC helps reduce the potential for corrosion of steel reinforcement in concrete.

Designed for both exterior and interior use, MPC restores and protects concrete and a variety of other surfaces from the consequences of exposure to chlorides, water intrusion, carbonation, freeze/thaw, and damage from impact and abrasion. With MPC a variety of finishes can be achieved to either restore concrete to a “like new” appearance or provide enhanced visual interest and curb appeal through a wide range of available colors, textures and patterns.

MPC Multipurpose Protective Coating

Renovate, Waterproof and Protect with the Versatility of MPC

Features:

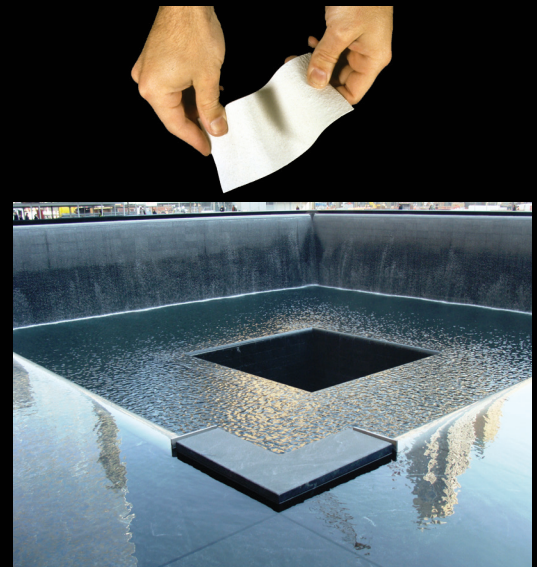

- Water vapor permeable – reduces corrosion of rebar
- Excellent adhesion and flexibility on concrete and other substrates
- Prevents intrusion of water, chlorides and carbon dioxide
- Excellent resistance to freeze thaw cycles, impact and abrasion
- Ideal for interior and exterior applications
- Suitable for both pedestrian and vehicular traffic
- Extensive choice of colors and textures – enhanced curb appeal

Use For:

- Pedestrian walkways
- Atriums & courtyards
- Driveways
- Balconies
- Pool decks and promenades
- Plaza decks & topping slabs
- Parapets and columns
- Walls & vertical surfaces
- Parking Garages and Ramps

Product Applications:

- Resurface and restore concrete
- Deferred concrete floor toppings
- Commercial, retail & residential flooring
- Educational & institutional flooring
- Food & beverage areas
- Hotels and resorts
- Mechanical equipment rooms
- Raised access floor waterproofing
