

Henry® Blueskin® LVC Spray Primer

Henry® Blueskin® LVC Spray Primer is a quick drying, low VOC (Volatile Organic Compound), rubber-based primer for multiple construction applications.

It is designed to enhance the bond of self-adhered air barrier and waterproofing membranes, and also to bond system accessories, such as drain board, filter fabric, and polystyrene to masonry, concrete, wood, gypsum board, exterior gypsum sheathing, and metal surfaces.

Blueskin LVC Spray Primer is the surface preparation of choice on above & below grade applications where a quick setting, aggressive tack, is required.

It meets various regulatory compliances, including Ozone Transport Commission (OTC) Rule for adhesives and sealants, South Coast Air Quality Management District (SCAQMD) Rule 1168 for adhesive and sealant applications, and all California Air District regulations.

Features and benefits

Easy spray application helps accelerate applying product over traditional rolling methods

Quick setting formula helps keep application process moving

Excellent adhesion to a wide variety of substrates allows for flexibility across various project types

Contains no chlorinated solvents and offers excellent alternative to methylene chloride-based products
